1) Parsing Table Conflict

* In an LL parser using the FIRST and FOLLOW contains terminals that can appear

* A Conflict

Same table cell for a non-terminal of left recursion, cannot uniquely decide

* LL(1) parser

Contains only one production and may cause incorrect

Decision: Modify the parsing table by factoring and ensure

2) Incorrect Parse Tree

* A Syntax

grammar production and the parse tree determines the order

* If the

the expression may be grouped with left-association group

* $\hat{r}$?
