

1) Parsing Table Conflict

- * In an LL parser using the FIRST and FOLLOW contains terminals that can appear
- * A Conflict
- Same table cell for a non-terminal of left recursion, cannot uniquely decide
- * LL(1) parser
- Contains only one production and may cause incorrect
- Decision: Modify the grammar factoring and ensure

2) Incorrect Parse Tree

- * A Syntax tree determines the order of derivation
- * If the expression may be grouped left-association group
